January 29, 1949.

To My Friends and Patrons:

Please accept this catalog with my very best wishes for your health, happiness and prosperity for 1949.

I hope your gardens, field crops, lawns, shrubs and flowers all did well for you last year.

The hot, dry weather damaged many lawns last Fall and my advice is to rake the bare spots well and reseed with Sterling Lawn Grass. Our lawn grass seed is quite high this year but our seed is the purest there is. If you buy a cheaper grade look out for chaff and weed seeds. Nearly all grass seeds are high, partly on account of crop failures and partly on account of Government buying for export. We buy the best grade even though it costs quite a bit more and I am sure it pays.

We will have a good supply of all kinds of seeds and plants this year. Beans are higher this year but peas are lower and other items are priced about the same. Our regular strains of Fordhook Bush Limas, World Record Peas, Holland Grown Erfurt Cauliflower, and Blue Ribbon Brussels Sprouts were extra fine in quality and yield last year. Be sure to order your supply early.

The Aquedulce Fava Beans gave a fine crop of very large pods last year and they paid very well.

Vigoro, applied this Spring, will give you a nice green lawn all Summer. An application of Bone Meal in the Fall will give the grass all the necessary elements to make the very best root and top growth. This is especially essential for grass in shade.

Agrico is a good fertilizer for your trees and shrubs. Make a number of holes around the tree as far out as the branches extend and put a small amount of Agrico in each hole. Then pound the hole in and if there is proper moisture you will see the effects in more luxuriant growth of your trees and shrubs. We have a special Acid Agrico for your Azaleas, Rhododendrons and Mountain Laurel.

Thanking you for your patronage in the past and asking a share, if not all, of your seed and plant business for 1949, I remain,

Yours for better Seeds and Plants,

DIRECTIONS

By carefully reading and observing the following directions, mistakes will be largely avoided, and your order can be filled more promptly.

Please use the enclosed Order Sheet and self-addressed envelope if possible. If you need more, let me know and I will be glad to send more to you.

Write your name, address and shipping directions plainly.

Always send the cash with your order, unless otherwise agreed upon. Money may be sent by P. O. Money Order, Bank Draft or Registered Letter. Stamps may be sent for amounts under \$1.00, but be sure to put in three-cent stamps, wrapped in waxed paper.

We pay the postage on all seeds sold by the pkt., oz. and $\frac{1}{4}$ lb. Quantities over that are priced net, to be shipped Parcel Post, freight or express, at purchaser's expense, unless otherwise stated.

If you desire your seed sent by Parcel Post, add 12c for the first lb. and 2c for each additional lb. of your order, allowing 3 lbs. extra for package. For amount of postage on plants see Plant Department. These rates are for anywhere on Long Island.

By pricing my seeds net, postage extra, you get your seeds delivered for less money than if I quoted a Postpaid price as the 12c per lb. extra would have to be counted in and added to each single lb. priced.

$\frac{1}{2}$ lbs. will be sold at lb. rates; $\frac{1}{2}$ bu. at bushel rates.

No charge is made for packing or packages.

NOTE—In all orders received before April 1st we include trial packets of different kinds of seed, the number of packets depending upon the size of your order. If you find any of these of particular value we would be pleased to hear of it.

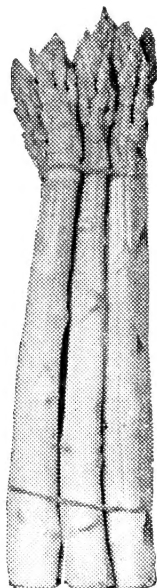

If you cannot use this catalog or receive more than one, will you kindly pass it on to someone interested? Thank you.

NOTICE—I give no warranty, express or implied, as to the productiveness of any seeds, bulbs, plants, shrubs or trees sold by me, and I will not be in any way responsible for the crop. My liability in all instances is limited to the purchase price.

Dunraven, N. Y., July 29, 1946:—We have one of the oldest Summer boarding houses in the Catskills and my flower garden is quite a feature. The gladioli are just beginning to bloom. The few bulbs I got from you were gorgeous and the plants look promising, many sending up three and four blooming stalks. Therefore, I am pleased.—Mrs. O. S.

I grew the Queen of Colorado Musk Melon in my garden last year and found that they yielded heavy and the quality was better than any Musk Melon I ever grew. The melons were good in size and shape.

PEAS

WORLD'S RECORD, LAXTON'S PROGRESS, LITTLE MARVEL, CARTER'S DAISY and TELEPHONE are the gardener's favorites for table use, freezing and canning. Sow these five kinds together and they will follow each other through the season.

OUR WORLD'S RECORD is the best kind for market. We have our regular Sterling Strain this year. Don't fail to plant a few. Even though peas should not pay as a market crop, the vines make fine green manure for Cauliflower, Brussels Sprouts and late Limas. GRASS, CLOVER AND ALFALFA SEED

Prices liable to change without notice. Grass seed is very scarce and high. Terms strictly cash.

I make my prices just as reasonable as is possible consistent with the quality. It is the very last fraction of 1% in purity that costs money. I believe that it pays big returns, too, as it is truer in seeds than anything else that **"the best is none too good."**

If your land is sour and Grass and Clover does not do well as a rule, a little lime sown on top of the ground and harrowed in before sowing the seed would be a great help.

Laughing Water, Southold, L. I., Aug. 10th.

After preparing the ground with your Peat Moss and Bovung, I sowed Sterling Lawn Grass about two weeks ago. I wish you could see it now. The grass is up about an inch and it looks like a piece of green velvet. H. C. H.

Mattituck, N. Y., Sept 18, 1948.

I wish to say that our small garden did wonderful this year from your seeds. It is our first experience with a garden and we had an abundance of everything including carrots. Our lawn was beautiful sown late this spring with Sterling Sandy Soil mixture. The white clover is still thriving after this long dry spell. V. S.

Home Gardeners

See the amazing effect of Vigoro on grass! The "Magic V" was fed Vigoro, the rest left unfed. Look what happened in just 2 weeks! Thick, luxuriant grass contrasts with the part that didn't get Vigoro!

LAWN MAKING

Our Lawn Grass Seed is mixed from the very best grass seed, recleaned and free from weeds, and we sell many hundred pounds all over Long Island, as there is no better grade seed on the market.

Loosen the soil in which a new lawn is to be made to a depth of at least five inches, and lighten it with humus, compost or manure if it is heavy and inclined to bake. Apply fertilizer liberally, either Sheep Manure, Bone Meal or both. Use Vigoro on established lawns in early Spring and early Fall.

Sow in the early Spring when cool weather and ample rainfall will insure complete germination and a good start for the seedlings before hot dry weather comes. If seeding must be delayed, special precautions must be taken to prevent the ground drying out. Early Fall is a very desirable time to seed, if moisture is sufficient.

See that the seed is well covered. Rake it into a new seed bed and roll so that the soil is firmed over the seed. Where seed is sown on an old lawn, always cover it with a top dressing of sand or soil and fertilizer and rake in. Seed thrown on the top of hard ground has no chance to grow and will merely wash off.

No Timothy or Rye Grass is ever used in our Lawn Grass Mixture.

JAPEDIZER

Kills the grubs and feeds the grass. Use 10 lbs. Japedizer per 1,000 square feet and water it in well. Afterwards loosen soil of bare and thin patches and reseed. Japedizer kills the grubs, spreads the Milky Disease in the beetles and fertilizes the grass.
